In-Person: Half-day

CEU Accreditation: MECP 0.4

This course outlines planning and assessment approaches to establish workplace electrical safety, for the protection of workers, by establishing methods to inform safe work practices.

This course is ideal for:

- Electricians and electrical engineers who want to expand their knowledge and skills related to electrical safety in the workplace.
- Maintenance personnel who want to ensure they are working safely and in alignment with the principles contained in CSA Z462.
- Supervisors and managers who want to enhance their understanding of workplace electrical safety and ensure their workers are protected from electrical hazards.
- Health and safety professionals who want to promote a culture of safety in their organization and develop effective safety programs.
- This course is ideal for anyone who works in an industry or profession where there is a risk of electrical hazards in the workplace. Whether you are an electrician, an electrical engineer, maintenance personnel, a supervisor, or a health and safety professional, this course will provide you with the knowledge and skills you need to promote workplace electrical safety and protect the well-being of workers.

Topics Include:

- Electrically safe workplaces
- Safe work planning (equipment labelling, PPE selection for arc flash, and working distance)
- Hazard identification
- Risk assessment
- Hazard elimination and risk control
